SOLAR-POWERED CRYPTO MINING

## BUSINESS LOAN

- Set up a solar-powered crypto mining farm in Pottstown, PA
- Utilize renewable solar energy for mining operations
- Deploy 32 high-efficiency mining rigs and servers

# Business Model

mining five major cryptocurrencies using solar power

- Generate consistent block rewards
- 24/7 uptime from renewable energy source
- Diversify production to optimize returns

CrosMinX

# CrosMinX

## THE PROBLEM

- Rising energy costs shrink crypto profitability
- Environmental concerns over traditional mining
- Centralized mining creates inequality
- Barriers for renewable-powered mining access

# Financials

Projected mining revenue estimates

min	Daily Revenue	Monthly Revenue	Yearly
C	\$560,00	168.800	\$2
H	\$972.80	29.184	35
OLA	\$652.80	19.584	23
TIB	\$153.60	4.608	5
DGE	\$128.00	3.840	4

# MINING ROI PROJECTION

**Bitcoin**

Significant,  
profitability,  
high ROI  
potential

**DogeCoin**

Moderate  
ROI,  
profitable  
but less than  
Bitcoin

**SoLana**

Good ROI  
potential,  
low power  
requirements

**Ethereum**

Moderate  
ROI  
dute power  
intensive  
mining

**SHIB**

Minimal  
ROI,  
less profitable  
compared  
to others
